AISECT will connect students and youth with AI, launched a skill journey

Published: 23 Oct 2026

Gwalior. Starting today, AISECT India's skill journey has begun to connect students and youth with the field of AI and teach them its nuances. The skill journey, starting today on October 22, will cover Morena, Sheopur, Shivpuri, Gwalior, Datia, and Bhind. During this 10-day journey, IT and other experts will provide students with the latest knowledge.

AISECT India, the country’s largest and most respected social enterprise in the field of skills, higher education, and employment-oriented curriculum, will give

students a basic understanding of the National Education Policy, skill-based employment, digital empowerment, and AI, and start connecting them with AI-based opportunities. Under this initiative, the skill development journey was launched. Vinay Kumar Agrawal, a member of the Dattopant Thengadi Workers' Education and Development Board under the Ministry of Labour and Employment, flagged off the skill journey. Anup Chaubey, the state coordinator of the skill journey and AISECT India, mentioned that during this journey, students in schools across different districts will be introduced to artificial intelligence, digital skills, and future-oriented employment skills.

During this time, AI awareness, AI competitions, AI skill challenges, digital skill assessments, and career guidance will also be provided. Along with this, participants who perform exceptionally in these activities will be honored and awarded during the skill development journey. On this occasion, Amit Shukla, Prashant Soni, and other staff members have also set off with coordinator Anoop Chaube on the 10-day skill journey.
